

LICENCE FREE SOLUTIONS

Did you know?

It is unlawful to operate most radios in Canada without an ISED Licence. We have licence free solutions approved by ISED.

DTR600

**DLR
SERIES**

With Motorola Solution's DLR and DTR Series radios, digital on-site communication is easier and more reliable than ever. Your team can communicate quickly, solve problems rapidly and address unexpected situations – ultimately improving operational efficiency and customer satisfaction. Enhanced features include a slim, rugged design that is simple, yet powerful. Crisp, clear audio and wide-area coverage keep employees connected and accountable wherever they are. On the DTR Series, an intuitive navigation menu ensures ease-of-use. They are the perfect partner for your business – delivering all the benefits of reliable digital communications.

The digital DTR, DLR, CB300D, Digital Desktop Radio and Range Extender protocol leverage Frequency Hopping Spread Spectrum (FHSS) technology, which makes communication more reliable and private when compared to standard analog radios. To take advantage of Private Communications, you can quickly set up your radio fleet with a unique Radio Profile ID Number. By choosing from 10,000 available codes, you can assure privacy from other neighbouring radios.
